Office Action Summary

Applicant No.

09/844,938

Applicant(s)

KARELL, ERIK K.

Examiner

Tho D. Ta

Art Unit

2833

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-17 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-17 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 27 April 2001 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). ____.
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) ____.
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the limitation "the securing member" on line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 8 recites the limitation "the securing member" on line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 9 recites the limitation "the securing member" on line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-5, 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Treusch et al. (5,598,824) in view of Kinkaid et al. (4,082,402).

In regard to claims 1-3, Treusch et al. discloses a fuel injector assembly 10, comprising: a body portion 20 that houses fuel injector components; an electrical

Art Unit: 2833

interface portion 53 supported by the body portion 20, the electrical interface portion 53 at least partially extends outwardly and away from the body portion 20; and at least one connector member 70 supported on the interface portion 53, the connector member 70 is outside of the body portion 20, the connector member 70 electrically couple the connector portion to an electrical male conductor 69.

However, Treusch et al. does not disclose that the at least one connector member 70 is a deformable connector member having at least one edge that is adapted to penetrate an insulation covering on an electrical conductor. Thus, the electrical connection between the connector member 70 and the male conductor 69 of Treusch et al. would become loose or disconnected due to vibration.

Kinkaid et al. discloses a deformable connector member 6 having at least one edge 6a that is adapted to penetrate an insulation covering 30 on an electrical conductor 28 to thereby providing a reliable electrical connection between the deformable connector member 1 and the conductor 28. Further, Kinkaid et al. discloses a plurality of connector members 6, each comprising a barb 6a of flexible metal material, wherein the conductor 28 comprises a flexible conductor cable; wherein a plurality of conductors 28 and a corresponding plurality of deformable connector members 6.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Treusch et al. invention by replacing the connector member 70 and the male conductor 69 with the deformable connector

Art Unit: 2833

member and a cable conductor as taught by Kinkaid et al. in order to provide a reliable electrical connection for the fuel injector assembly.

5. Claims 6--9, 16 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Treusch et al. and Kinkaid et al as applied to claims 1, 3, 12, 15 above, and further in view of Kamon et al. (5,326,273).

Treusch et al. as modified by Kinkaid et al has been discussed above.

Kamon et al. discloses a securing member 3 placed over the conductor 1 and the connector member 2, wherein the securing member 3 comprises plastic that is molded over the conductor 1 and the connector member 3 for providing a seal at the connection portion between the conductor 1 and the connector member 2, wherein the securing member 3 comprises at least one material selected from the group consisting of plastic, foam or silicone (column 3, lines 44-48).

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to further modify Treusch et al. invention by adding the securing member as taught by Kamon et al. in order to provide a water-proof layer at the connection portion between the conductor and the connector member.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tho D. Ta whose telephone number is (703) 308-0800. The examiner can normally be reached on M-F (8:00-5:30).

Art Unit: 2833

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on (703) 308-2319. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1782.

A handwritten signature in black ink, appearing to read "THO D. TA", is written in a cursive style.
